

Ideation Phase

Define the Problem Statements

Date	01-10-2026	Team ID	SWTID-2026-5415
Project Name	Import Data Using Transform Maps (Spreadsheet)	Maximum Marks	2 Marks

Customer Problem Statement Template – adapted to the project.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	ServiceNow administrator / project user	import spreadsheet data into ServiceNow	manual handling can lead to inconsistent mapping	source fields must be mapped to target fields	I need a clear, repeatable process
PS-2	Authorized ServiceNow user	view and work with transformed records	related employee information is not in the source row itself	the Employee relationship must be configured	I need reliable context and controlled access

Project Problem Summary

The project needs a repeatable method to load spreadsheet records, map source columns into a ServiceNow target table, connect the Employee reference, and validate the resulting data and access.

Scope

- Spreadsheet source data
- Import Set / Load Data
- Transform Map
- Employee reference and Department dot-walking
- Role and ACL validation
