

Project Design Phase

Solution Architecture

Date	01-10-2026	Team ID	SWTID-2026-5415
Project Name	Import Data Using Transform Maps (Spreadsheet)	Maximum Marks	4 Marks

The architecture bridges the business need and the ServiceNow implementation.

Import Data Using Transform Maps (Spreadsheet) - Solution Architecture

Architecture Components

Layer	Component	Purpose
Source	Spreadsheet	Provides the source records.
Import	Import Set / Load Data	Loads spreadsheet rows into ServiceNow's import process.
Transformation	Transform Map	Maps and transforms source fields.
Data	Target table	Stores transformed records.
Relationship	Employee reference	Connects each record to an employee.
Related data	Department	Accessed through dot-walking.
Security	Role + Read/Write ACLs	Controls access.
Validation	Impersonate	Checks configured permissions.
